Dear Barbecue Fan,

Congratulations on your new barbecue branding iron. You're now ready to put your own seal of approval on a barbecue well done. A brand shows family and friends the pride and joy you take in preparing only the best barbecue.

We're confident you'll enjoy your brand for many years to come.

Sincerely,  
BrandMySteak.com

#### How to use your new brand.

The handle is offset on the face of the brand. This allows you to angle your brand and place it down through the grates on your grill.

Place the face of the brand in the hot coals or on an electric burner. Heat the brand at least 5 to 7 minutes. (or until red hot) Just before serving your meal, press the heated iron against the food with a side-to-side and top-to-bottom rocking motion. This keeps the brand from sticking to the meat which makes for a much cleaner brand.

**CAUTION:** Steak branding irons can cause serious injury & damage. Never apply a hot steak branding iron onto skin or anything that is possibly flammable. Keep out of reach of children.
